PROJECTS

SpecWise | Product Specification Comparison Platform

[Github](#) | [Live Site](#)

- Built a web application that helps users explore, search, and compare device specifications in one place.
- Implemented dynamic data fetching and filtering logic to make technical specs easy to navigate and understand.
- Designed and developed a responsive, user-friendly interface using Next.js, TypeScript, and Tailwind CSS, and deployed the project on Vercel with Git/GitHub for version control.

FootCom | Football Comparison Platform

[Github](#) | [Live Site](#)

- Built a football comparison web application that provides data-driven insights for comparing players and teams across leagues and seasons.
- Integrated external APIs to fetch and display verified football statistics through a responsive, intuitive interface.
- Developed a scalable and performant frontend using Next.js, TypeScript, and Tailwind CSS, and deployed the app on Vercel with Git/GitHub for version control.

VOLUNTEERING & ACHIEVEMENTS

3RD Place – GDGoC.LMU Hackfest, 2025

- Worked in a team of 3 to build a functional booking appointment web-app that allows students to book appointments with doctors,
- Gain recognition as an innovative solution in healthtech
